SUMMARY

Frontend Engineer with **3+ years of experience** building scalable and high-performance SaaS web applications using **React.js, Next.js, and TypeScript**. Experienced in designing **component-based architectures**, reusable **design systems**, and responsive UI components with strong emphasis on **performance optimization and maintainability**. Possesses practical **full-stack exposure (NestJS, PostgreSQL, MongoDB)** enabling effective collaboration with backend teams to deliver reliable end-to-end features.

CORE COMPETENCIES

React.js | Next.js | TypeScript | Redux Toolkit | React Context (Context API) | REST APIs | Component Libraries | Design Systems | Performance Optimization | Frontend Architecture | Responsive UI Development | Agile/Scrum

EXPERIENCE

Software Engineer

Rahi Platform Technologies

October 2024 – Present

Pune, MH, India

- Engineered scalable **React + Next using TypeScript** interfaces for a **vertical SaaS platform**, supporting multiple business workflows and modular feature development.
- Architected a reusable **component library** including checkbox, dropdown/select, typography, and grid-based input components, reducing duplicate UI development and accelerating frontend feature delivery by **20–25%**.
- Owned end-to-end **configuration-driven UI development** for the **Collections module**, delivering **80% of screens** using an internal **UI Configurator**, ensuring scalable, consistent, and rapidly configurable workflows.
- Implemented complex **validation systems** using configuration rules and custom **interceptors** across **Loan Management, Collections, and Master Data Management modules**, enabling cross-field comparisons and dynamic enforcement of business logic.
- Collaborated with **product managers** to translate business requirements into scalable frontend solutions and define implementation strategies for configurable workflows.
- Designed advanced **form UX patterns** including scroll-to-error navigation, contextual validation messaging, and collapsible sections to improve usability of complex workflows.
- Optimized performance using **lazy loading, code splitting, and React memoization (useMemo/useCallback)**, improving rendering efficiency for form-heavy applications.
- Contributed to **Agile/Scrum delivery** through sprint planning, backlog refinement, and peer code reviews, ensuring consistent and high-quality feature releases.

Software Engineer - Dev

Zymr Inc

August 2022 – September 2024

Pune, MH, India

- Delivered scalable **React + TypeScript** web applications with reusable UI components and modular frontend architecture for enterprise SaaS clients.
- Built an **Employee Feedback Portal** and **HR Analytics Dashboard**, improving employee engagement metrics by **20%**.
- Developed a cross-framework **web component library** using **Stencil JS and Lit JS**, enabling UI reuse across **React, Angular, and Vue** applications.
- Integrated **RESTful APIs** and implemented schema-driven **JSON Forms**, improving form validation accuracy and reducing frontend validation defects by **15%**.
- Collaborated with designers and backend engineers within **Agile development cycles**, contributing to sprint planning, peer code reviews, and iterative feature delivery.

PERSONAL PROJECTS

Socio Vert | *React, Redux, Firebase, MUI*

[Github](#)

- Developed a **real-time chat platform** with topic-based rooms, secure authentication, and live messaging functionality.
- Implemented centralized state management using **Redux** with real-time synchronization powered by **Firebase**.
- Designed responsive UI using **Material UI** and optimized rendering performance for seamless messaging interactions.

Book Recommender App | *React, Python (Flask), Axios, MUI*

[Github](#)

- Built a **full-stack recommendation platform** delivering personalized book suggestions and favorites management.
- Developed frontend using **React** and integrated REST APIs from a **Flask backend**.
- Implemented routing, **Context API state management**, and responsive UI components using **Material UI**.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frameworks: React.js, Next.js, Node.js, NestJS, Stencil JS, Lit JS

Styling: SASS, Material UI, Styled Components

State Management: Redux Toolkit, Context API

Testing: Jest, React Testing Library

Database: PostgreSQL, MongoDB, Firebase

Version Control: Git, GitHub, GitLab

Collaboration Tools: Agile, Scrum, JIRA, Figma

EDUCATION

Shivaji University, Kolhapur

Bachelor of Technology in Computer Science and Engineering

Kolhapur, MH, India

July 2018 – July 2022
